Plastic Pirates - Go Europe!: Floating macro-, meso- and microlitter data collected by citizens in rivers in Europe between 2022 and 2024

Deutsches Zentrum für Luft- und Raumfahrt e. V. (DLR)

Floating macro-, meso- and microlitter data collected by school children from the surface water of European rivers and streams in the period 2022-2024 for the Plastic Pirates – Go Europe! project. The data have been validated by...

Plastic Pirates - Go Europe!: Macrolitter data collected by citizens on riverbanks in Europe between 2022 and 2024

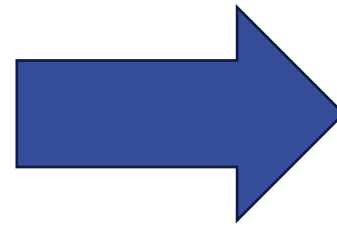

Deutsches Zentrum für Luft- und Raumfahrt e. V. (DLR)

Macrolitter data collected by school children on riverbanks in several European countries in the period 2022-2024 for the Plastic Pirates – Go Europe! project. The data have been validated by experts of the Plastic Pirates partner...

April 2025:
New publication
of datasets

Question 1) Protocols with DOI?
(Zenodo)

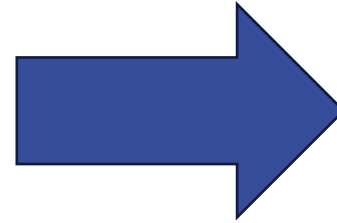

(Acknowledges original authors)

Current datasets + April publication

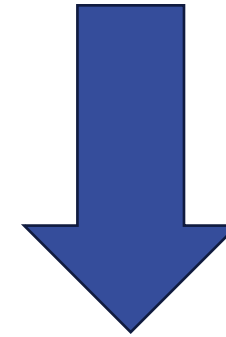

The screenshot shows the Zenodo project page for Plastic-Pirates. The project is part of the EU Open Research Repository and is hosted by the Deutsches Zentrum für Luft- und Raumfahrt e. V. (DLR). It includes a 'New upload' button and a search bar. Two datasets are listed:

- Dataset 1:** Plastic Pirates - Go Europe!: Floating macro-, meso- and microlitter data collected by citizens in rivers in Europe between 2022 and 2024. Uploaded on December 17, 2024. 97 views, 17 downloads.
- Dataset 2:** Plastic Pirates - Go Europe!: Macrolitter data collected by citizens on riverbanks in Europe between 2022 and 2024. Uploaded on December 17, 2024. 169 views, 34 downloads.

Research questions
Data analysis

Research manuscripts (riverine litter)

Question 2) Publication strategy

Scientific Peer Reviewed Publications:

- I. All European riverine datasets (until April 2025):
first research questions (macro + micro)
- II. In-depth data analysis (macro + micro; macro and micro)

Research manuscripts

Question 3) Manuscript – I: Research questions (Macro):

Most common types and quantities of litter per region? 
(Group B: riverbanks; Group C: floating litter) 

Litter diversity? (Group B) 

Are floating and riverbank litter types common?
(Macro: Group B, C)

Effectiveness of environmental policies? (Group B)

Research manuscripts (riverine litter)

Question 4) Manuscript – I: Research questions (Micro):

Most common polymers and concentrations of MPs per region?

(Group C: floating litter, Extra)

MPs diversity? (Group C/extra)

Research manuscripts (riverine litter)

Question 5) Manuscript – II: Research questions (Macro + Micro):

Spatial and temporal trends in the distribution and abundance
(Macro: Group A, C; Micro: Group C)?

- Hotspots (accumulation)
- Weather and seasonal patterns
- Hydrological dynamics
- Climate regions
- Extreme weather events (floods)

Potential sources (Perception; Group D) vs actual land use on litter composition (Group B)?

Question 6)

Other Research Questions?

Question 7)

Mapping active contributors
